PROFESSIONAL SUMMARY

Full Stack Developer with **10 months of internship experience** building web applications using React.js, JavaScript, Node.js, Express.js, MongoDB, and SQL. Proficient in **frontend and backend development, RESTful APIs, JWT authentication, role-based access control, database integration, and debugging**. Experienced in engineering **secure AI-powered applications and workflow automation platforms**.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, SQL
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
Backend: Node.js, Express.js, REST APIs, JWT Authentication, OAuth, Socket.IO
Databases: MongoDB, PostgreSQL, MySQL, Redis
Tools: VS Code, Git, GitHub, Postman, Vercel, Render
Core Concepts: Data Structures and Algorithms, OOP, API Integration, Debugging, Software Testing

EXPERIENCE

TrippinPal Travels Private Limited **May 2026 – Jun 2026** | Certificate
Full Stack Developer Intern

- Enhanced full-stack features for an **AI-powered travel platform**, contributing to frontend, backend, and product functionality.
- Diagnosed software issues, refined application functionality, and coordinated with **product, design, and business teams**.

SmartBridge **Oct 2025 – Mar 2026** | Certificate
AI/ML Intern – HematoVision AI

- Engineered a blood cell classification model using **Python, TensorFlow/Keras, and EfficientNetB0 transfer learning** to distinguish four white blood cell types.
- Applied image preprocessing, model training, and prediction workflows through a modular Python implementation.

SmartBridge **May 2025 – Jul 2025** | Certificate
Generative AI Intern – Smart City Assistant

- Built a full-stack AI-powered web application using **React.js, Node.js, Express.js, MongoDB, REST APIs, and IBM Granite**.
- Integrated frontend and backend services with **JWT authentication, protected APIs, and role-based access control**.

PROJECTS

NxtBiz – AI-Powered Business Operations Platform GitHub | Live Demo
React.js, Node.js, Express.js, MongoDB, JWT, Socket.IO, Redis, BullMQ

- Created a full-stack platform combining CRM, AI email analysis, workflow automation, invoice generation, support tickets, and PDF reporting, powered by **8 specialized AI agents**.
- Secured REST APIs with **JWT refresh-token rotation, HTTP-only cookies, and RBAC across 4 user roles**; enabled real-time notifications through Socket.IO.

AgentFlow AI – Multi-Agent Workflow Automation Platform GitHub | Live Demo
React, Node.js, Express.js, MongoDB, React Flow, JWT, OAuth, Socket.IO

- Engineered a visual drag-and-drop workflow builder featuring AI-assisted workflow generation, multi-agent orchestration, and integrations with **Gmail, Google Sheets, Slack, and Discord**.
- Configured workflow execution monitoring, execution timelines, dashboard analytics, JWT authentication, and encrypted credential management.

PhishGuard – ML-Based Phishing URL Detection GitHub | Research Paper
Python, Pandas, NumPy, Scikit-learn, Random Forest

- Designed a phishing URL classification approach using **16 handcrafted lexical and structural features** extracted from **100,000+ URLs**.
- Evaluated a Random Forest classifier with an **80:20 train-test split**, balanced class weights, and precision, recall, and F1-score metrics.

EDUCATION

B.Tech, Computer Science and Engineering (Cyber Security) **May 2026**
Rajeev Gandhi Memorial College of Engineering and Technology, Nandyal **CGPA: 8.31/10**
Industry-Ready Full-Stack, AI & ML Program – NxtWave Academy **2024 – 2026**

PUBLICATION

Machine Learning-Based Phishing URL Detection Using Lexical and Structural Features Read Publication
Published in the *International Journal of Computer Applications*, Vol. 187, No. 96, April 2026. Research focused on URL feature engineering and machine learning-based phishing detection.

CERTIFICATIONS

AI Workflows & Automation Workshop – NxtWave (2026) · AWS Generative AI (2025) · AWS Certified Cloud Practitioner (2025)
